Employment & Experience

Ontrack Management Solutions

Full-stack Developer Feb 2019 - Present

- Working with the Systems Architect, BA, UX / Designer and QA to improve / maintain Ontrack MS* which provides end-to-end project, job and task tracking with built-in quality management tools. As it is a closed source project it is not publicly available. However, mock-ups of the UI are available.
- Developing back-end functionality with Node, Express, Knex and EJS. Writing clean, reusable code.
- Building responsive interfaces with Vue.js and some angular.js, Bootstrap, HTML and CSS to meet product and design specifications.
- Learning MVC, OOP, Rest APIs and following principles such as YAGNI, KISS, DRY.
- Conceptualizing, coding, deploying, and iterating on next generation prototypes. Maintaining legacy code and making improvements to increase readability, reliability and reusability.
- Pragmatic approach to analyzing technical issues and clearly communicating solutions.

Constructor Labs

Full-Stack JavaScript bootcamp, Sept – Nov 2018

- Built interactive, data-driven web applications over an intensive 12-week programme
- Learned and demonstrated complex concepts within JavaScript, React, Redux, Node and Express
